

Interface Temperature

```
+ InCelsius()      double
+ InFahrenheit()   double
+ InKelvin()        double
+ average()         Temperature
```

Abstract Temperature

```
# Final Unit      String
# temperature     double

+ abstractTemperature()
+ InCelsius()     double
+ InFahrenheit()  double
+ InKelvin()      double
+ average()       Temperature
+ compareTo()     int
+ toString()      String
# getUnit()       String
# getTemperature() double
# isCelsius()     boolean
```

Celsius Temperature

```
+ CelsiusTemperature()
```

Fahrenheit Temperature

```
+ FahrenheitTemperature()
```
